

Powerful 3 in 1 Multipurpose Cleaner, Sanitizer, & Deodorizer

Tired of dry, cracked, bleeding hands?

AquaO3 harnesses the power of the most powerful oxidizer, OZONE. When infused in tap water it creates a solution with more oxidizing power than bleach but completely safe, non-toxic, and pH neutral. Total TECHNOLOGY.

Ever run out of hand sanitizer or wipes?

Never use or buy another hand sanitizer again. Just remove the cap and refill with cold tap water anywhere. Sanitize your mask while you are at it. It's just water and oxygen. What are you afraid of?

- **Ozone** is 3 oxygen atoms that are formed from a natural process from an electrical or ultraviolet source creating the most powerful and chemical-free oxidizer. After destroying the contaminant ozone reverts back to normal oxygen leaving no residuals like chemicals.

- **Ozone** has already been proven to destroy viruses, bacteria, mold, fungus, algae, allergens, and other pathogens with no prejudice. Unlike chemicals which bacteria often builds resistance to.
- **Ozone** is so powerful that it is used for cleaning wastewater treatment plants since the early 1900's and is also used to sanitize water for the bottling industry to keep everyone safe. Now you know.
- **Ozone** was granted the GRAS (Generally Recognized as Safe) approval from the FDA(2001) and USDA(2002) for direct use on food contact surfaces including even meat and poultry products.

Also available in 20ml sizes

Capacity: 300mL

Aqueous Ozone destroys 99.99% of bacteria and viruses.

- Portable
- USB-C Rechargeable
- One button
- Unlimited cold tap water refills
- 1-year warranty
- Effectively removes odors
- Ozone has been approved by the USDA and FDA for direct contact with food products, including all meat and poultry products.
- People, kid, and pet safe.
